**HOW RURAL ADDRESSING WORKS**  
 EXAMPLE: The Rural Address to the right in red illustrates how emergency personnel would know that the access is on Range Road 12, on the east side, approximately 75 metres (150 divided by 2) north of Township Road 542.

**GENERAL RULES AND GUIDELINES**  
 • System is ACCESS based  
 • Numbers increase going north and west  
 • Odd numbers are on the south and east of roads  
 • Even numbers are on the north and west of roads  
 • There are 32 possible addresses per mile. 16 per side at 100 metre intervals  
 • Reference Road is the Township Road or the County or Range Road to the east  
 • If two accesses fall within the same interval OR two (or more) residences share one access, one (or more) will be given a letter designation, whichever is to the north and/or west. See the following examples:  
 54313 and 54313A RGE RD 12  
 1111 TWP RD 544 and 1111A TWP RD 544  
 In subdivisions, usually only one number will be assigned as the lots are much smaller. In subdivisions and hamlets, addresses are referenced from where an internal subdivision road accesses a County road. In cases of more than one access, one will be chosen as the main access using the rule of precedence:  
 EAST-SOUTH-WEST-NORTH  
 Lots are numbered clockwise if possible. In the case of multiple blocks with duplicated lot numbers, the legal lot number and rural address number will likely not be the same.  
 Using the example subdivision on the grid, the main access is to the east. Therefore the rural address is:  
 54220 RGE RD 11  
 A lot in the subdivision:  
 202, 54220 RGE RD 11  
 The second access to the west is:  
 2ND ACCESS TO 54220 RGE RD 11
