- Carried.

IPS - OTHER ITEMS

- 158-2020 MOVED BY Councillor Lloyd Giebelhaus that County Council be recessed to hold a Municipal Planning Commission meeting at 10:25 a.m.
- Carried.

MUNICIPAL PLANNING COMMISSION

023SUB2019, NE 17-55-03 W5M, to create two (2) 40.0 +/- acre parcels, one (1) 45.0 +/- acre parcel and one (1) 18.0 +/- acre parcels from a quarter-section subdivided by Highway 43 (previous severance of a portion of parcel)

159-2020

MOVED BY Councillor George Vaughan that based upon a review of the applicable bylaws and legislation as well as review of the land-use planning criteria as set forth in the Subdivision and Development Regulation, 2002, that subdivision application 023SUB2019, Applicant/Owner: Cory & Janelle Gauthier to create two (2) 40.0 +/- acre parcels, one (1) 45.0 +/- acre parcel and one (1) 18.0 +/- acre parcels from a quarter-section subdivided by Highway 43 (previous severance of a portion of parcel) within NE 17-55-03 W5M, Tax Roll #5503174001 (Div. 3), be approved subject to conditions and for the following reasons:

Adjacent Landowner Concerns: See attached Adjacent Landowner Julien, Celeste received: February 7, 2020

See attached Adjacent Landowner Julien, Celest letter dated: October 4, 2019

Topography: The quarter section is flat to rolling with 20 acres in hay and remainder in tree cover.

Soils: Class 4: Soils in this class have severe limitations that restrict the range of crops or require special conservation practices. The limitations are so severe that the soils are not capable of use for sustained production of annual field crops. The soils are capable of producing native or tame species of perennial forage plants, and may be improved by use of farm machinery. The improvement practices may include clearing of bush, cultivation, seeding, fertilizing, or water control.

Subclass T: adverse topography-either steepness or the pattern of slopes limits agricultural use.

Class 5: Soils in this class have very severe limitations that restrict their capability to producing perennial forage crops, and improvement practices are feasible. The limitations are so severe that the soils are not capable of use for sustained production of annual field crops. The soils are capable of producing native or tame species of perennial forage plants, and may be improved by use of farm machinery. The improvement practices may include clearing of bush, cultivation, seeding, fertilization, or water control.

Subclass T: adverse topography-either steepness or the pattern of slopes limits agricultural use.

Storm Water: No storm water issues for the proposed parcel.

Flooding Risk: No flood issues are expected on the property.

Access: Access is to be provided through the local road system (Range Road 34 on east, Township Road 553 on North and Range Road 34A on West).

Water Supply: The proposed middle acreage is currently serviced. Water may be obtained through cistern or well for the remainder of the quarter-section.

Private Sewage System: The proposed middle acreage is serviced by Open Discharge. Conformance to new property lines and to plumbing code to be confirmed. A variety of private sewage disposal systems may be used on the remainder of the quarter-section.

Adjacent Land Uses: Adjacent land uses are a mix of acreages and agricultural operations. North 43 Lagoon Commission land is located to the south/east (SW 16-55-03 W5M). Highway 43 East Waste Commission land is located across Highway 43 to the west (NW 17 and NE 18-55-03 W5M).

Response To Landowner Comments: Traffic: Service road via caveat is required for the development as the existing access to Highway 43 may be removed in the future.

Large Number of Existing Undeveloped Acreages: There are a large number of undeveloped parcels in the municipality, however Policy 6.3.2 of the Municipal Development Plan (Bylaw 23-2014) allows for a subdivision of up to four (4) parcels.

Cutup Usable Agricultural Land: Soil is 4T and 5T, therefore is considered marginal.

And based upon staff recommendations and the above reasoning, the Subdivision Approving Authority approves the proposed subdivision, subject to the following conditions:

1. All subdivision conditions must be fulfilled within twenty-four months of date of subdivision approval.
2. Pursuant to Section 654 of the Municipal Government Act, R.S.A. 2000, all outstanding property taxes be paid.
3. Pursuant to Section 655 of the Municipal Government Act, R.S.A. 2000, the Owner and/or Developer shall enter into and abide by the provisions of a development agreement with Lac Ste. Anne County to the County's satisfaction and at the Developer's expense. This agreement may include, but not necessarily be limited to:
 - a. Approach #1: Existing Driveway, no work required.
 - b. Approach #2: New Approach, requires gravel and culvert. 12 meter culvert and 10 yards of gravel.

c.Approach #3: New Approach, requires gravel and culvert. 12 meter culvert and 10 yards of gravel.

d.Approach #4: New Approach, requires gravel and culvert. 12 meter culvert and 10 yards of gravel.

Once the above-noted work has been completed on your approach(es), you MUST return your "Final Approach Inspection Form" to the Planning and Development Department to have your approach(es) inspected. The proposed survey (from your surveyor) must be submitted before Public Works can complete the inspection of the approach(es).

4.Pursuant to Section 661 of the Municipal Government Act, R.S.A., 2000, 5.2 metres (17.1 ft.) of road widening adjoining all municipal road allowances is required and may be registered through caveat. Caveat and agreement to be provided by the Surveyor for road widening on Range Road(s) and Township Road(s).

5.This decision shall be valid for two (2) years from the date of issuance; if this decision is appealed (to Subdivision and Development Appeal Board {SDAB} or Municipal Government Board {MGB}), any new decision will be valid for a time specified by the appeal body as listed within a revised decision (SDAB decision or MGB order).

6.Applicant/Landowner is required to submit a survey drafted by an Alberta Land Surveyor. Any alterations to the subdivision design from the date of referral may require a new application and referral process.

7.Developer/Landowner to provide professional verification that on-site sewage disposal system is functioning properly and within the requirements of the Safety Codes Act, or to confirm replacement/upgrade of existing system to one which conforms to provincial and municipal requirements. Cost of Inspection (\$235.00).

8.Dedication of a 30 meter wide service road right-of-way across the entire highway frontage of NE 17-55-03 W5M on the north side of Highway 43 at no cost to Alberta Transportation. In this instance Alberta Transportation is willing to accept the service road registration by caveat.

Regarding the caveat for service roads, please advise the applicant that they are required to complete 3 copies of a service road agreement and one caveat for the service road. To ensure these documents will meet the requirements of the Land Titles Office it is recommended they be prepared by an Alberta Land Surveyor. At "<https://www.alberta.ca/service-road-agreement-and-caveat.aspx>", templates for these can be downloaded. The Surveyor is to have their client execute all 3 copies of the service road agreements and forward two of these along with a caveat for the service road to: Adrienne Kisko, Land Technologist, Divisional Services, Alberta Transportation, 2nd floor Twin Atria Building, 4999 - 98th Avenue, Edmonton, AB, T6B 2X3, for execution on behalf of the Crown.

RESERVES:

9.The Applicant must provide a market value appraisal of the subject land, excluding any and all buildings or improvements, prior to subdivision. This appraisal is used to determine money-in-lieu of Reserves value as per Section 667 of the Municipal Government Act (MGA). A market value appraisal is to be obtained from a licensed Alberta Appraiser as a condition of this subdivision approval. For this application, the land subject to Reserves is 10% of the following: 7.284 HA (proposed parcel(s)).

Reserve Eligible:Yes

MR Eligible (HA) (total parcel): 7.284

Value per hectare (HA) :\$6,691.00

Land Subject to Reserves

(10% of MR Eligible):0.7284

Amount Owing:Shall be no more than \$6,691.00/ha \$4,873.72

RESTRICTIVE COVENANTS:

10.That a caveat be placed on Title to notify the landowner that certain locations have prohibitions to construction as a result of site specific factors, environmental setbacks, including but not limited to water well due to the proximity of the southern parcel to the Regional Landfill.

Carried.

160-2020

MOVED BY Councillor George Vaughan that County Council that the Municipal Planning Commission be adjourned to resume the County Council meeting at 10:28 a.m..

Carried.
