Road Upgrades Regarding Natural Resource Extraction and Processing Development Permits

Effective Date: October 3, 2018
Review Date: October 3, 2023
Cancel: Policy 313-8: Road Upgrades Regarding Natural Resource
Extraction and Processing Development Permit
Resolution #: 619-18

CAO Signature: 

Purpose: To set out guidelines for road upgrading along Natural Resource Extraction and Processing Haul Routes. This is to be used as a guide for developers for the road upgrades required of Development Permits relating to Natural Resource Extraction and processing along approved haul routes. The following provisions shall be in effect:

- 1) That all Class 2 gravel pits with a development permit complete dust control measures along the full length of the approved haul route for the entire time the Extraction or Processing facility is in operation.
- 2) That all Class 1 Natural Resource Extraction and Processing sites with a development permit and an approved Haul Route with 5 or less gravel trucks a day be required to provide dust control measures the full length of the approved Haul Route for the entire time the Extraction or Processing facility is in operation.
- 3) That all Class 1 Natural Resource Extraction/Processing sites with a development permit and an approved Haul Route with on average of 6 or more gravel trucks per day be required to base and pave all roads that have been approved as the Haul Route of the Development.
