Resolution #: 504-2023

CAO Signature:

Purpose: To set out guidelines for allowing the connection to the WILD Water Transmission Line.

Guidelines:

1. All Developments or Subdivisions wanting to or being required to connect to the WILD Water Transmission line Commission must get approval from the County and the Commission prior to issuance of their application.
2. Any Development or Subdivision that has connected to the Wild Water Transmission line must install an air gapped reservoir as a condition of the approval to the satisfaction of WILD.
3. Where connection is required the applicant must comply with any additional requirements imposed by the County or the Commission in relation to the water utility including but not limited to requirements related to:
 - a. Pipe Size
 - b. Flow Rates
 - c. Materials
 - d. Oversizing

- e. Engineering
- f. Infrastructure ownership
- g. Contractor Restrictions
- h. Insurance
- i. Any other requirements deemed reasonable by the County or WILD in the implementation of a connection to WILD or a larger system operated by the County.

4. Where a developer connects to the Transmission line the developer may be required to install the pipe diameter for the new development at an equal diameter to that of the WILD transmission line from the Transmission line to the reservoir.
